Release Summary - Version 1.0.0

Product Name: Savvy Shopper
Team Name: Savvy Developers

1   Key User Stories and Acceptance Criteria

1. **User Story 1:** As a user, I want to be able to create an account and my tracking link via dashboard.

   Acceptance Criteria:

   - The "Create Account" link is available on the login page.
   - When clicking the link, the user is prompted to enter their email address and password.
   - After entering the information, a new account is created.

2. **User Story 2:** As a user, I want to be able to track an item by pasting the link on my dashboard.

   Acceptance Criteria:

   - Given that the user has copied a valid item link to the clipboard,
   - When the user pastes the link into the dashboard's tracking input field.
   - Then the app should recognize the link and initiate the tracking process for the item.

3. **User Story 3:** As a user, I want to be able to be notified when the price of a product I am tracking has dropped.

   Acceptance Criteria:

   - Items needs to be tracked on user's dashboard.
   - User sets target price for alert.
   - The system generates an email alerting the user their item has reached target price.

2   Known Problems

1. **Issue 1:** Webscraping proved unreliable particular websites.
   Status: Issue
   Workaround: Users were advised to avoid logging items from those sites until the issue was fixed.

2. **Issue 2:** Password resetting would not update in the system if a user requested to reset their password.
   Status: Bug
   Workaround: Reset Password was disabled and user's were advised to contact customer support directly if password was forgotten.

3. **Issue 3:** Graph will sometimes stop working due to lack of data-points on a particular item and it's price.
   Status: Bug
   Workaround: User's were advised to dis-regard the error and wait for price tracking to update.

4. **Issue 4:** Adding an item from a Webpage that our app does not support.
   Status: Bug
   Workaround: User's are given an error message notifying them that the retailer is not supported.

3   Product Backlog

1. **User Story 4:** Create a browser extension for users to track items easier.
   Priority: High

2. **User Story 5:** Implement two-factor authentication for improved account security.
   Priority: High
