Sprint Report #1
Product Name: SavvyShoppers
Team Name: SavvyDevelopers
July 12, 2023

Actions to stop doing:

- Lateness to meetings
- Getting off track during meetings
- Working off the back of a handful of individuals within the team

Actions to start doing:

- Being more proactive about sprint plans, sprint reports, and TA meetings
- Documenting any and all changes to the codebase
- Setting up unit tests
- Start attending meetings on-time
- Maintaining the 15-minute time limit for the Scrum meetings

Actions to keep doing:

- Continue Working hard
- Keep on attending meetings
- Continue sticking to Scrum principles
- Keep maintaining good relationships among team members

Work completed/ not completed:

- Added user authentication / authorization
- Added data table to show price change over time for each item
- Added functionality to add item to firestore
- Added cron-jobs where items are tracked once a day for each user

Work completion rate:

- As a user, I want to be able to paste in amazon links and view relevant information in our app.
    - We completed this, including links for ebay, newegg, craigslist, amazon, and best buy
- As a user, I want to be able to visualize price trends of my item as well as change the notification threshold for my item

- We plan to complete this user story by the end of the second sprint. Currently, we have limited visualization
- As a user, I want to be notified when my item changes in price
    - Our email service is completed but we don't have it connected yet to our event service

User Stories Completed	Ideal Work Hours	Number of Days	User Stories per Day
3	30	7	0.42
Ideal Work Hours per Day	Average User Stories per Day	Average Work Hours per Day	
5	0.42	4.28
